See the sections that follow for more controller information.

### SO YOU WANT TO BE A PRO?

Just learn what all of the Pros have learned through years of skating—there is a learning process to this extreme sport. You will fall, miss rails, become unbalanced and other things will happen that cause you to slam and bail into the hard ground. Fortunately for you, this is a video game: you won't be hurt in the process! Just keep practicing and with time you'll find the Pro Skater rhythm and suddenly you will be busting 500,000 point combos with ease!!

To QUICKLY become a Pro, read the Basic and Advanced Controls sections of this manual and PRACTICE! Always remember, Repetition is the mother of Mastery!

#### THE ULTIMATE CHALLENGE

So you're willing to become Tony 4 GBA elite—good for you! Complete the following and you'll have bragging rights to all your friends...if you can do it, of course!

- 100% all of the Amateur Goals (Total Goals: 85)
- Complete ALL of the Pro Challenges (Total Challenges: 19)
- 100% all of the Pro Goals (Total Goals: 57)
- Trigger all 257 Gaps

- Collect 90 out of 90 packages
- Collect the \$600 spread out in the Amateur and Pro levels
- Get the high score in every level

#### THE BASICS

Use these to not be a complete n00b!!

- You will automatically start moving once the level loads. Hold the B Button to crouch and pick up speed. When skating on the ground, you'll want to ALWAYS hold the B Button to gain speed.
- Turning Press Control Pad ← and → to turn. Control Pad ← turns left and Control Pad
   → turns right. UNLESS your skater is FACING the screen! Then the controls are reversed.
- Ollie (skater term for JUMP!) Press and release the **B Button**. The longer you hold the button, the more air you'll get. Just ollieing doesn't score any points. You need to have more skills than that!
- ullet Braking Press Control Pad ullet to slow your skater. Holding Control Pad ullet will stop your skater. Your skater will move if you do not HOLD Control Pad ullet.
- ullet Sharp Turns Press Control Pad  $\Psi\leftarrow$  or  $\Psi\rightarrow$  to make sharp turns.
- Spinning While in the air, press and hold Control Pad ← or → to spin your skater. This adds more points to your tricks, and is vital to scoring the high level combos.

- Quick Recovery Pressing the A, B, L, and R Buttons rapidly at once to quickly get back on the board. Don't waste your time when you bail!!
- Control Pad Diagonals Using Control Pad K, ħ, ∠, or ≥ makes you perform more difficult tricks and gives you the opportunity to score points more easily. This is for flips, grinds, lips, and air tricks.
- Flip Tricks After ollieing, press one of the eight Control Pad directions and tap the L Button to perform a flip trick.
- Grab Tricks To hold a grab trick, press and HOLD the **R Button** along with one of the Control Pad directions to perform the different grab moves. If you keep holding the **Grab Button** (**R Button**) then you will continue to hold the trick even if you're not holding the Control Pad direction.
- Grind Tricks When near a lip (curb, top of quarter pipe, rail, etc) ollie and press the A Button. This will get you grinding—just be sure to watch the balance meter and use Control Pad ← and → to maintain your balance. Remember that Reverts reset [HUH?] your balances (manual and grind) so use them to ensure long trick linking. Once grinding, you DO NOT have to hold the A Button.
- Lip Tricks Skate up a ramp at 90 DEGREES then press and HOLD the A Button plus a direction on the Control Pad to perform the skater's lip tricks.
- Special Meter Perform and link some tricks to add charge to your Special meter. Once it's filled, it'll turn red and then you can perform special tricks or flatland tricks.

#### ADVANCED CONTROLS

So you know how to skate around! Good for you, n00b! Now add these advanced moves to really take your game to new heights!

- Switch Skating While skating, press the **R Button** to switch your stance. All of these Pros skate in Regular or Goofy footed stances. The opposite of their normal stance is called Switch (icon is on the TOP LEFT of screen). Skating Switch gives you more points, but causes your player to have less balance, makes it harder to perform lip tricks, slows you down faster, and causes you to not get as much air! Until you stat up Switch all the way up, try to avoid having the Switch icon on the top left of your screen.
- Advanced Stances Press the **L Button** while NOT skating in Switch to activate the NOLLIE stance. Press the **L Button** while skating in Switch to activate the FAKIE stance.
- Advanced Ollie To get more air when you want to ollie, press and HOLD the B Button and press Control Pad ↑ then release the B Button. This will perform a No Comply or a Fastplant. Or you can press Control Pad ↑ instead to perform a Boneless or Beanplant! Also, use any of these at the top of a quarter pipe to get more air. Just remember to release the B Button AFTER your board passes the lip (skater term for the top of the ramp), this will prevent you from doing a carry through when performing these tricks on quarter pipes. Master this move; it allows you plenty of time to pull some of the best trick combinations in the game.

- 180s To perform a 180, press Control Pad ←← or →→ to quickly rotate 180 degrees OR to close out your current rotation. You'll find that when performing the more advanced air tricks, this is helpful for lining up the landings. (The Judo Grab, for example.)
- Wall Rides To prove that you are not a nOOb, you'll need to learn this skill. It's one of the more difficult ones in the game, but with practice you'll be performing them without problems. When skating at a wall at a 45 DEGREE angle, ollie towards the wall, then press and hold the opposite direction that you are ollieing and press and HOLO the A Button. You'll find that with practice you'll easily be able to perform wall rides and then you'll quickly scale walls and open up a whole new gaming experience!

### Combo Linking

Use Manuals in combination with Reverts to link vert and street tricks.

Manuals – Press Control Pad  $\uparrow \Psi$  or  $\Psi \uparrow$  to activate a manual. These can be activated while skating or just when you're about to land from catching any air. Use Control Pad  $\uparrow \uparrow$  and  $\Psi$  to balance.

Reverts – Press the **R Button** just as you're landing to perform a Revert. This trick must be performed just as you land, otherwise it will not activate. Quickly press the manual button combination to go into a manual and combo link in your air tricks.

For the biggest possible combos, try to make most of your Special Tricks and be sure to hold those Grind Specials for a little while!

- Spine Transfers Press the L/R Buttons at the SAME time when airing on a quarterpipe that has another quarterpipe sitting back to back with it. As long as you pressed the button combo before hitting the peak of your jump, it will work.
- Level Duts Here's the savior of your bailing career. If you hit a ramp at a weird angle and are heading straight for a major bail, press L/R buttons and find yourself suddenly landing. You'll lose all of your speed, so you'll have to either perform grind transitions or lip tricks to build your speed back up!
- Grind Transitions Check these combos out in the Grind Transition menu from the Pause Menu. If you press combinations of Control Pad  $\Lambda/\Psi$  and tap the **A Button**, the transition will occur. This will give you a speed boost and add a 0.5 multiplier.
- Lip Transitions See Basic Control: Lip Tricks. Perform a Lip Trick and then press combinations of ↑/ → and tap the A Button to add lip transitions to your lip trick. These add a 0.5 multiplier to your combo. Make sure you Revert to link the lip trick to a manual and keep the combo going.
- ◆ Flatland Tricks Flatland tricks can only be performed when you're skating in a manual while your Special Meter is FULL! Check out the Pause Menu for more information on how to do specific tricks. Combinations of Control Pad ←/→ plus the A, B, L, or R Buttons perform the different flatland tricks. Modifying a flatland is easy; just press Control Pad ←/L Button.

• Special Tricks – Configure the button combinations of your Special Tricks to what you want in Edit Tricks in the Skate Shop. With your Special charged, perform an air, grind, lip, or manual and then press the appropriate button combo. Check out the different special trick groups to see which type of tricks each Special is. You CAN modify your initial four Special Tricks, you just can't change them to a different trick. When you finish certain competitions first, you'll be awarded with an additional special trick slot.

### MAIN MENU

When you first enter the game, the Main Menu will come up and present you with five options that will help you select what kind of game you want to play. Use the Control Pad ↑ and ↓ to scroll through the menu, and the Control Pad ← and → to change the settings. When you are satisfied with your choices, press START to begin the game. Use the B Button to return you back to a previous

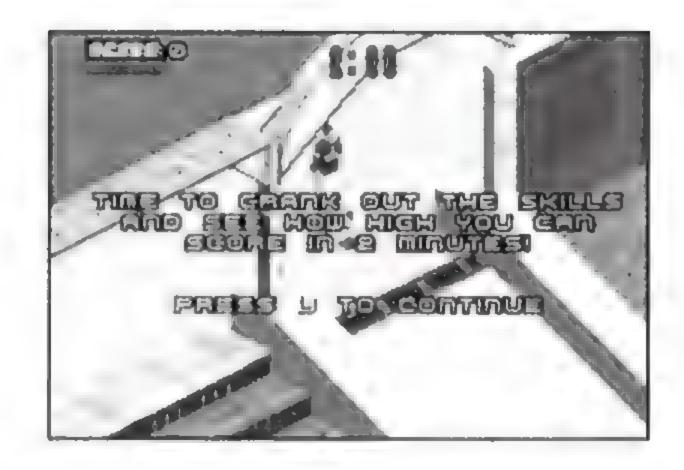

menu. Check on-screen button prompts to see all available options.

### GAME MODES

#### CAREER MODE

The first setting in the Main Menu is for when you're ready to start trying to be a Pro: it's time for Career Mode. Goals will vary from level to level. To receive a goal, press the **L Button** when next to a pedestrian.

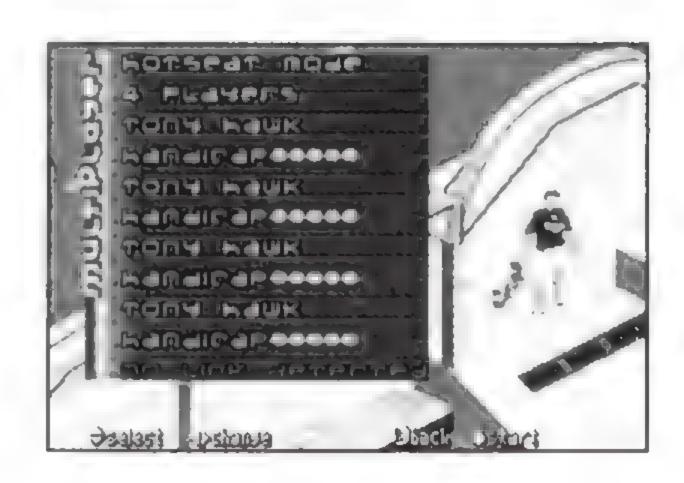

#### SINGLE SESSION

Single Session is a timed run of a level. While no goals can be achieved, the player can earn a high score for the level and gaps found will count in the gap checklist.

#### MULTIPLAYER

There are two types of supported multiplayer games: Hotseat (using one GBA) and Linkplay (multiple Game Boy' Advance systems linked by a Game Boy' Advance Game Link" cable).

You will need the following to play any of the linked multiplayer modes: Game Link<sup>®</sup> cable and a copy of Tony Hawk's Pro Skater™ 4 for each linked Game Boy® Advance.

Tony Hawk's Pro Skater" 4 supports two to four players for Hotseat and Linkplay using a Game Boy" Advance Game Link" cable.

### setting up a multiplayer game

First, choose the Multiplayer option in the Main Menu and press **START** to enter the Multiplayer Menu.

You will then enter the Connection Screen. You will always default to Hotseat unless you have a Game Link" cable and are connected to your friends who also have Game Boy" Advance system with a Tony Hawk's Pro Skater" 4 Game Pak. Have the other players press **START** from the Main Menu to enter Multiplayer.

Use Control Pad  $\uparrow$  and  $\checkmark$  to switch between Select Skater and Handicap. Use Control Pad  $\rightarrow$  and  $\leftarrow$  to change your skater or to add/decrease your handicap. Move handicap right to increase stats, left to decrease stats.

Press **START** once all players have selected their skater and handicap. You will then be taken to the Game's Mode and Options Selection screen.

Note: The host determines the levels that are playable. The secret level is not available in Multiplayer. Other skaters do not show up as exact replicas of the Single Player skaters to ensure fast Multiplayer gameplay. Stat, Special, and Deck changes carry into Multiplayer.

Trick Attack and HORSE are available in Linkplay and Hotseat.

If you have any problems starting a multiplayer game, reset all Game Boy' Advance systems, ensure that the Game Link' cable is securely inserted into all Game Boy' Advance systems, and repeat the instructions above. See page 36 for instructions on using Game Link' cables.

**Trick Attack** — This mode is a competition to see who can get the highest point total within the selected time period. You can knock down opponents if you run into them. The person with the highest score at the end wins.

**HORSE** — Each round, players attempt to do a trick to put up the most points. If you get the lowest points, you'll get a letter toward HORSE, or whatever word you choose (keep it clean now!).

Tag — In the first ten seconds, whoever has the lowest score, is 'IT'. Whoever stays 'IT' the longest loses the game. If you are 'IT', you can do tricks to slow the other players down so you can catch them and tag them. When another player is tagged, they are 'IT'. Also, players can score big to slow down other players, thereby making it easier for them to be tagged!

King of the Hill – There's a crown out there somewhere and the player that finds it first is the King. While you're the King, there will be a crown above your head, and your score – in time-will start counting up. To keep things fair, you'll skate slower while you're wearing the crown. Run into the current King to make him cough up the Crown. The first person to hold the crown for the preset limit wins the match.

**Free Skate (Multiplayer)** — In this mode, you can skate with your friends and check out a level with no time limit and no objectives, just pure fun.

### FREE SKATE (SINGLE PLAYER)

Choose Free Skate to skate through the levels you've unlocked in Career Mode with no time limit. Free Skate is a great way to get a feel for the ramps and grind lines of a level.

This mode cannot be used to attain a high score and only the score of the current trick will be shown on the on screen display. This mode is basically "just for fun". However, any gaps found in Free Skate will count in the gap checklist.

## SELECT SKATER

The second setting in the Main Menu is the Select Skater option.

Choose the skater you want on the Select Skater menu using the Control Pad. Try every level with each skater because they all have unique skating abilities and specials. The vert skaters will get bigger air on the ramps. The street skaters have better balance on manuals and grinds. But they're all pros and every one of them can kick butt on a board.

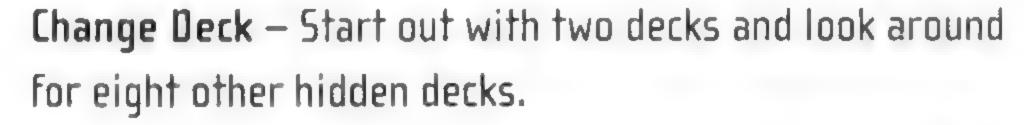

If you'd like to get a better look at the skater, use the **L Button** and **R Button** to rotate the skater around.

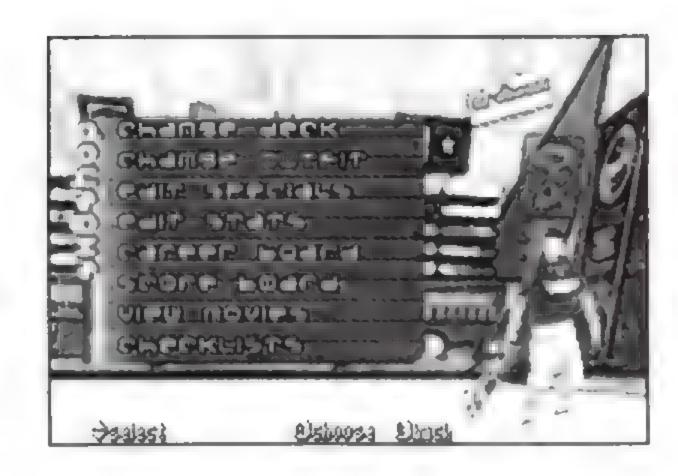

Once you've chosen the skater, you can then pick a game mode, a level, adjust the game options, enter the Skate Shop, or try the Pro Challenges. After you have all your selections ready, press **START** to begin your game.

Important Note: The game will save data for all the skaters each time you finish a session.

### SKATE SHOP

You can head into the Skate Shop from the Main Menu or while skating to change your skater's appearance and equipment, or to check on the status of your career. Press the A Button to access the selection.

**Change Outfit** — By pressing the Control Pad ← and →, you can change outfits if you have unlocked them.

If you select CUSTOM SKATER from the Main Menu, you will be able to modify all of the skater's clothes. This is the Create-A-Skater feature of the game, allowing you to design your own skater that makes a fashion statement (or question...). You will be able to create up to four different outfits for your custom skater. Use the Control Pad  $\spadesuit$  and  $\blacktriangledown$  to scroll through the list of options, and press the Control Pad  $\spadesuit$  and  $\Longrightarrow$  to change appearance. You will see the representation of a skater to the right change as you make modifications.

**Edit Specials** — Adjust button configurations for Specials or add new Specials (unlock new ones by winning competitions).

**Edit Stats** — You can change the stats of the selected skater. By collecting stat points in Career Mode, you can give different skaters better stats.

NOTE: You can only add new stats, you can't reassign stats already used.

**Career Board** — Check this menu often to see the status of your career. You can see how many goals you've achieved for each level, and also the number of stat points, cash, and decks you've collected. You can switch from Amateur to Pro.

Score Board - Check here for the high scores.

View Movies - Check back here to replay any movies you've unlocked.

Checklists - View for the Gap Checklist and the Secrets Menu.

### OPTIONS

You can change the settings of a game by scrolling down to Options on the Main Menu and hitting the A Button. You can adjust the following options.

**Sound** — You can change the sound volume based on a 10 point scale, with 10 being as loud as you can be, and 0 if you're trying to sneak a game with no sound.

- Sound Effects: Same as sound, you can adjust the sound effects from 0-10.
- Song Advance: When enabled, Song Advance will automatically advance to the next music track for game modes lasting more than two minutes. This can be toggled On and Off.

**Controls** — Use the Controls menu to modify the controller settings. The **A Button**, the **B Button**, and both the **L** and **R Button** assignments can be changed. Whatever feels most comfortable to you is the right setting, so feel free to experiment.

**Brightness** — Modify brightness to 0 for normal play. Modify to 5 if the screen is very dark.

**Blood** — When you bail, you bleed. But for those that don't want to see the blood, you can change this option to decrease the amount of blood, or turn it off for consequence-free skating.

**Normal/Kid Mode** — Turn Kid Mode to **ON** if you want to bail less and remain on your board more. Since this is technically cheating, you get a P (Poser) icon on the scoreboard. Beating a Pro Challenge in Kid Mode will not open the Secrets Menu. The game defaults to Normal Mode.

**Save Games** — Select this option to save your game. You can copy and delete saves through this menu. There are 4 available save slots.

Reset Scores - Reset the High Score Board.

**Credits** — Check this out to see a list of all the hard-working folks that helped to create this game.

## STARTING THE GAME

Once you've selected all your options from the Main Menu, you're ready to dive into the game. Simply press START and you'll jump into the selected level with your skater.

#### PAUSE MENU

**Continue** — This will allow you to return to your game.

**Cancel Goal** — This will cancel the current goal. Only available when a goal is activated.

**Retry Goal** — This will reset the current goal so you can try again. Only available when a goal is available.

**View Goals** — Check this option out whenever you need to be reminded about your goals. This option will only be available if you are not in a goal.

**View Tricks** — Use this to see a list of all your tricks, including special tricks, grab tricks, flip tricks, lip tricks, and transitions.

**Skate Shop** — Select to enter the Skate Shop. Your game will be saved.

Main Menu — Select to return to the Main Menu. Your game will be saved.

## SCORING

Adding spins to your moves introduces a

Doing a trick the first time will give you 100% of the points listed below. Each subsequent time you pull off that same trick in a combo or during a timed goal, your score decreases as the table indicates. In Free Play mode, your score for a trick will decrease subsequent times it's pulled off only if the trick's performed during the same trick combo.

1st 100%	180° 1.5x
2nd 50%	360° 2.0x
3rd 25%	540° 2.5x
4th on 10%	720° 3.0x
s to vour moves introduces a	900° 3.5x

multiplier. With each 180° spin, your score

multiplier goes up. The bigger the multiplier,
the bigger the score!

Grabs have a base score associated with
them, however they can be held for a longer
time for additional points.
